

College & University Immunization Compliance

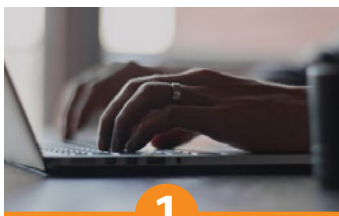

LOUISIANA

As of 2006, all first time freshmen University and College students in Louisiana are required to either have received the meningococcal conjugate vaccine in the last 10 years or to have a physician signed Immunization Exemption document. If a student has not met this requirement, they are not allowed to participate in any school activities.

Louisiana college and university staff is faced with the challenge of manually collecting and processing student meningitis vaccine paper records prior to the start of each semester. With a Student Medical Record (SMR) software like Magnus Health, schools save time, decrease overhead costs, and ensure immunization state law compliance for their school.

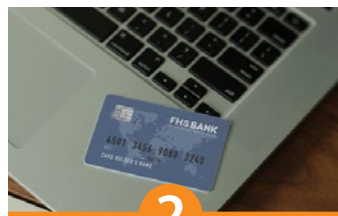

How do colleges benefit from using Magnus?

- **Collect forms online** – Universities and colleges eliminate paperwork and manual form processing by collecting all required forms in one online portal.
- **Manage immunization compliance** – Schools ensure 100% compliance with the state law by connecting immunization requirements with the enrollment process.
- **Save time** – Staff saves time by collecting, reviewing and managing immunization records online.
- **Automate communications with students** – Students receive frequent automated email reminders regarding their missing immunization records.
- **Ease of use** – Students can upload their immunization record right from their mobile device.
