

College & University Immunization Compliance

NEW JERSEY

As stated in New Jersey Administrative Code Chapter 57 8:57-6-1 through 6-18, immunization requirements for attendance at a postsecondary institution include: proof of or exemption for measles, mumps, rubella, hepatitis B. For students residing in on-campus housing are also required to provide proof for meningococcal disease. The college or university is required to collect and maintain these completed forms from students who will be attending classes on campus.

Prior to the start of each semester, New Jersey college and university staff are faced with the challenge of manually collecting and processing student vaccine paper records. With a Student Medical Record (SMR) software like Magnus Health, schools save time, decrease overhead costs, and ensure immunization state law compliance for their school.

Save time and release student holds faster

- Universities and colleges eliminate paperwork and manual form processing by collecting required forms in one online portal.
- Students receive frequent email reminders regarding their missing immunization records.
- Magnus nurse reviewers process student immunization records within 1-2 business days.
- Automate the student hold release process via integration with your Student Information System.
- Simple reporting feature allows you to run immunization reports for internal or Public Audits.
- If your university or college has additional required immunizations, Magnus can process those as well.

Students submit immunization records online

- Students can upload their record right from their mobile device.
- Transferring students can download a copy of the immunization record to submit to their next school.
