

## **Magnus Health Academy**

### COVID-19 Safety & Compliance Pledge

Kelly Taylor Grade: Class of 2024

In order to successfully mitigate the risk of spreading COVID-19 among our school community, everyone must do their part. It is important that each of us—parents, students, employees, and all household members—to adhere to the CDC and state guidelines for reducing the spread of this virus both on and off-campus. The health and safety of all of us depend upon individual commitment in the following areas:

1. Read and adhere to the Magnus Health Academy COVID-19 Policy.
2. Review materials provided on the school website to learn about infection control, safety, and school procedures.
3. Practice the recommended guidelines to help prevent the spread of germs while on campus and at home.
4. Follow the symptom screening systems adopted by the school.
5. Stay home or keep your student home if symptoms of illness are present.

As the COVID-19 pandemic and the latest scientific efforts to reduce its impact are rapidly changing, the local, state and national guidelines are subject to change. Our school policy and compliance measures may be modified as well.

**By signing, I agree to the information above.**
